Experience

Webmaster and Solo Web Developer

ACDA Arkansas April 2026 - Present

- Maintain and update a client-facing website using Bluehost, managing content, multimedia, forms, links, and registration resources.
- Implement website updates including online registration forms, payment resources, sign-up materials, video content, and images.
- Manage website content remotely and independently, ensuring information is accurate, timely, and relevant to current events and organizational needs.
- Communicate with clients via email to gather requirements, resolve questions, and coordinate website changes.
- Independently prioritize website maintenance tasks, manage deadlines, and organize ongoing updates with minimal supervision.
- Proactively identified opportunities to improve website functionality and user engagement, initiating a meeting with clients to discuss implementing a photo gallery and expanded video content.
- Demonstrate initiative and independent problem-solving by identifying website needs beyond routine maintenance.
